£1million Contract Win for Rollright

Rollright has announced a £1million integrated facilities management contract for a shopping centre and retail park in Runcorn. Halton Lea Shopping Centre and Trident Retail Park should prove the springboard to growth in the provision of facilities services for Rollright.

The additional services now being provided follow an initial contract for essential site maintenance services, now include both security and cleaning. In total, Rollright will have responsibility for over 50 employees at this established site in the North West which is used by almost 16 million shoppers per year.

Commenting on the contract award, Charles Sinton, Commercial Director, Rollright, said, "Our experience at Halton Lea Shopping Centre leads us to believe that the benefits of integrated service delivery will enable us to offer an increasingly cost-effective service delivery solution to retail centre owners.

"By combining the individual service lines at Halton Lea Shopping Centre and Trident Retail Park, we are confident we will improve standards of service and ultimately, the economies of scale achieved by this approach should prove to be a welcome benefit to the tenant line-up at these retail centres."

Rollright will be announcing a further significant new business win in the coming weeks.

Editors Notes
